dissolving

drying

finished!

In less  
than  
1 minute

## The safe solutions for users, environment, customers

Typical application: large garment and textile manufacturers, logistic center, online shops, warehouse, ...

### SAFETY

#### + Chemicals with high safety profile for user, environment and fabric

All the cleaners used have a favourable safety profile. Halogen free solvent with flash point > 61 °C; and high performance detergent specifically formulated to have excellent cleaning efficacy, high safety profile and to provide superior hydrophile / lipophile balance characteristics.

#### + Limitation of contact with chemicals and wastes

Direct suction from cleaners' canister avoids the need of frequent refill operation and then the risk of spills or workers exposure.

#### + Integrated double aspiration system for maximum safety

Integrated aspiration system, with double aspiration from the top exhaust head and from the working board, allows conveying vapors appropriately, limiting vapor release in the workplace.

### EFFICIENCY

#### + Two system in one: each stain treated with the specific product

Double efficiency system: choose solvent or detergent through the frontal switch to treat each stain in the most effective way

#### + Mechanical action allows faster cleaning with milder chemicals

Triple cleaning power for fast cleaning: pulsating jet breakdown, chemical dissolution, push-and-aspiration effect.

#### + Spot removal with fast drying and no rings

Built in heating system allows to increase detergent efficiency and use warm air for fast drying, avoiding ring mark. Slit shaped air nozzle allows fast drying of wider surface through high speed air blade.

### EASE OF USE

#### + Ergonomic design for workers safety

Flexible handle support allows an ergonomic working posture. Rotating dual working area fits every piece of garment.

#### + KREBS stain removal with one hand

Multifunction handle allows managing the whole stain removal process with one hand.

#### + Easy installation in every facility

Integrated storage for water, solvent and exhaust liquids allows installation even without hydraulic utilities.

Technical Specifications	KREBS DUO
Voltage / hertz:	400 V / 50 Hz
Amperage:	15 A
Air:	Filtrated, oil-free, 6-8 bar
Dimensions:	900 x 900 x 1900 mm
Net weight approx.:	90 kg
Origin:	Switzerland
